WORK EXPERIENCE

2024-2025

Real Estate Website

Designed and developed a real estate website that allows users to post and search for properties. The system provides a platform for users who want to sell or purchase real estate, as well as users interested in real estate information. It also supports communication and information exchange between users, with a user-friendly interface inspired by Facebook.

2025-2026

Gold Chat Bot

Developed a chatbot system similar to ChatGPT, focusing on providing information about gold prices in the global market. The system is designed for users interested in gold and those who want to learn more about the gold market. The chatbot can provide information, answer questions, display historical gold prices, and provide information about various factors that may affect gold prices.
